OUR BOARD CHAIR'S THOUGHTS

This past year our Foundation has been almost exclusively focused on helping mitigate the devastating effects of the virus in BC. Our healthcare systems were overwhelmed by the need for intensive and critical care beds, with the most vulnerable populations, especially the aged, suffering the most. All aspects of life as we know it have been affected by the virus; no one has been untouched. Yet, we have learned much and now focus on how we can prepare for and prevent future threats, including large scale infectious disease outbreaks and pandemics.

Through the second half of the year, we also began working on an extraordinary new collaboration with the Government of BC's Ministry of Health, that will see the BCCDC Foundation play a critical role in supporting applied public health research and practice to better enable the province to quickly respond to emerging threats; supporting recovery from COVID-19; strengthening community resilience; and improving population outcomes well beyond the current pandemic. To this end we will be working closely with the Ministry of Health, the BC Centre for Disease Control (BCCDC), Public Health Leadership in BC, and other key partners and stakeholders. We are deeply grateful to all our partners for their support and for their leadership throughout the pandemic.

We are also grateful to our inspired and caring donors who contributed nearly \$385,000 to our Emergency Response Fund. Thanks to your support, among other key COVID-19 projects, we were able to fund the COVID-19 SPEAK Survey, open to BC residents, which helped in understanding how the virus spread, as well as some of its unanticipated consequences. We also helped fund and launch the COVID-19 SPEAK Survey Dashboard. This interactive dashboard is a component of a comprehensive research project, "BC's COVID-19 Response: Your Health, Our Future," to help public health experts and leaders across the province better understand COVID-19 and public health measures, and prepare for and prevent spread of the virus.

Thank you to our small, but intensely dedicated and effective staff who rose to every challenge presented throughout the year. My thanks also to the Board of Directors for their compassion, expertise, and leadership. While COVID-19 took up much of our focus, we're proud to have maintained other priorities too, such as the overdose crisis, and we look forward to re-engaging in all our public health priorities in the coming years. In the meantime, we wish you good health.

Cathy Daminato

Cathy Daminato, BSc, MBA

CHAIR - BOARD OF DIRECTORS

OUR ORGANIZATIONAL UPDATE

IMPACT OF COVID-19

As we began our fiscal year 20-21, we were already in full COVID-19 response mode. Knowing we would be needed and that our supporters would want to help, we launched our Emergency Response Fund (ERF) in late January 2020, and by April 2020, we were seeing a tremendous response from our donor community, well beyond our expectations. This continued as the pandemic worsened, and through 20-21 we were able to tackle COVID-19 response through a two-pronged approach. The first was by raising the dollars needed to fund critical research and data that our public health leadership and experts needed to answer new questions, apply real-time population health data to decision-making, and ensure pandemic measures were grounded in evidence. Second, we knew we needed to play a role in helping to distill the complicated evidence circulating. We used our communications channels to do just that, providing as much digestible content as we could throughout the year, to help our

followers and supporters have a reputable source of information.

From the beginning of the year, through to the end, and still as we look ahead, as a public health organization, it is our responsibility to do whatever we can to support all British Columbians during times of normalcy, and during times of crisis. This meant shifting our focus and resources significantly to COVID-19 response through 20-21, but that doesn't mean we didn't work on other critical areas, and specifically the overdose crisis. From the early days of the pandemic, we could see the worsening impact as more people were dying from overdose, and it became very clear that the two public health emergencies were becoming entangled and conflated. Addressing COVID-19 without considering the overdose crisis is impossible. Our work will continue to focus on both crises until we see an end to the suffering.

“Public health doesn't ever stop; public health is how we can, and will, continually work towards improving positive health outcomes and health equity. And we won't stop with COVID-19. We will continue to help everyone get through the pandemic, recover and rebuild, and we will continue to do all our work to create a healthier and safer province.”

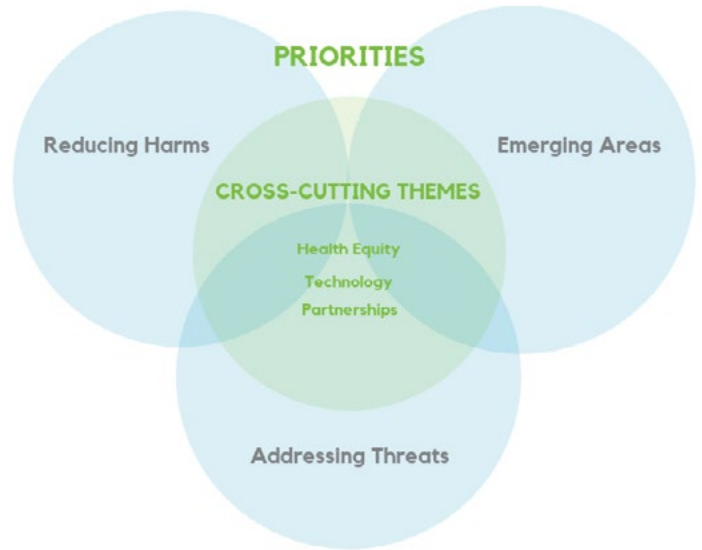

-Kristy Kerr, Executive Director

STRATEGIC PLAN PROGRESS

As our first Board-driven strategic plan was nearing its end, we undertook an assessment and the Board and Executive Director worked together to plan for the next two years. The incredible work and commitment that went into our strategic and organizational planning in 2018, 2019, and early 2020 allowed us to refresh and reshare our [strategic plan for April 2020 to March 2022](#). Those critically-important planning processes allowed us to invest in new fund development activities, expand our portfolio in marketing and communications to raise our profile and awareness of why public health matters, engage with new partners, focus on organizational growth and development, and develop projects and programs to support and undertake public health initiatives.

As we progressed through fiscal year 20-21, we saw we were on the right track, and focused on our priorities to reduce harms, address threats, and respond to emerging areas; this work, planning, and strategy set the stage for our ability to respond to COVID-19 at a time when it was very clear about the need for, and an importance of, a public health foundation. As we look ahead to the coming years, we also reflect on what it has meant for us to have such a key role in public health, and how we will leverage this momentum into even greater success for BC.

OUR WORK

EMERGING AREAS PRIORITY: COVID-19

Because of the incredible and rapid influx of donor support to our Emergency Response Fund, in May 2020 we were able to quickly fund the largest-ever population health survey at that time in Canada—the BC COVID-19 SPEAK Survey “Your Story, Our Future.” This provided vital information to help public health address the unfolding pandemic. Knowing how important this kind of information is, we worked with the BCCDC on plans to support a [second SPEAK Survey](#) to launch in early 2021-22. As many aspects changed, including the introduction of COVID-19 vaccines and a new vaccination roll-out, having two distinct data points to evaluate the pandemic and the impact on people is key.

In June 2020, we formed an alliance with three other fundraising organizations—a partnership that is unique and demonstrates why, when we come together, we can do more, faster. The [BC COVID-19 Combat Collective](#) is a collaboration between the BCCDC Foundation, the VGH & UBC Hospital Foundation, the BC Cancer Foundation, and the University of British Columbia. Together we are raising funds to tackle the COVID-19 virus from every angle: through prevention, testing, and treatment.

Through our partnership with the BCCDC and the BCCDC Public Health Laboratory (BCCDC PHL), we were able to allocate funds to an innovative and rapid area of focus: [wastewater testing as an](#)

BC COVID-19 COMBAT COLLECTIVE | VGH & UBC Hospital Foundation | UBC | BCCDC Foundation for Public Health | BC CANCER | powered by CHARITABLE IMPACT

[important tool](#) for tracking the spread of COVID-19. Researchers at the BCCDC PHL have been studying viruses in wastewater since 2018. When the pandemic was declared, the BCCDC PHL began to focus on COVID-19 and with methods already developed, were able to quickly switch gears and apply these methods to detect SARS-CoV-2 in BC's wastewater. By testing for SARS-CoV-2 in wastewater, researchers can assess the occurrence of the virus in an entire community.

In addition, with the launch of the novel COVID-19 vaccine program, we went into action on a [first-of-its-kind collaboration](#) with two of our partners—the Michael Smith Foundation for Health Research and Genome BC—and we spent the early months of 2021 preparing to launch a COVID-19 vaccine research initiative that would provide funding for short-term, high-impact research necessary to understand key areas of vaccine research such as equity and access, hesitancy and misinformation, variants of concern, and effectiveness, including other priorities. As the year wrapped up, we were in the midst of an intense, rapid application process that will show positive impacts on our pandemic in coming years.

Throughout the year we also focused on information—with access to so much online, and through many avenues, we know it's important to create a one-stop shop for evidence-based public health information. Including simple [infographics](#) that our followers could share, blog posts sharing key information from [reflections](#) to [misinformation](#) and the [importance of vaccine research](#), as well as the creation of a [COVID-19 resource page](#), we put an emphasis on COVID-19 communications that we wove through all of our work.

As you can tell, we've been busy this year! Addressing COVID-19 and putting our ERF into action has taken tremendous effort, for tremendous payoff. With our donor community and bringing philanthropy to public health, it is very clear that the work we undertake not only has made great impact this year, but will continue to be impactful well beyond.

REDUCING HARMS PRIORITY: COMPASSION, INCLUSION, AND ENGAGEMENT (CIE)

Through our Reducing Harms priority area, we continued to fund [CIE](#), a province-wide initiative of the BCCDC in partnership with the First Nations Health Authority that builds capacity for emerging peer (people with lived and living experience) groups to organize and engage in anti-stigma, harm reduction, and overdose response work in their communities. We are proud to have funded this amazing program that developed skills and capacity for peer groups to grow and ultimately become self-sustaining, and provided grants to carry out their work. We're happy to report that we contributed enough funds to support four peer grants, in addition to the 15 grants that we funded last year, and capacity-building in communities across BC that would not have otherwise been supported.

ADDRESSING THREATS PRIORITY: ASTHMA

Through our Addressing Threats priority, we remain committed to research focused on the prevention of asthma that suggests that limiting antibiotic use in infants can lead to fewer cases of asthma in children by preserving a healthy gut microbiome. As asthma is the most prevalent chronic childhood disease, being able to reverse the asthma epidemic would save hundreds of thousands of children across the country from unnecessary suffering, their families from worry, and alleviate massive burden on our healthcare system.

OUR PUBLIC HEALTH HEROES

From \$3 to nearly \$160,000, and hundreds of gifts in between, we are humbled and grateful by the response of our donors this year. Each gift enables us to work towards improving the health of all British Columbians; and every donor is a Public Health Hero to us. Thanks to all our donors and partners, we raised over \$460,000 this year, and we're grateful to our 523 new Public Health Heroes who joined our commitment to the health of our communities.

Whether an existing or new supporter, we couldn't do our work without our donors. In particular, the response to our COVID-19 campaign was so incredible, allowing us to fund critical work that is helping address the pandemic in BC. We appreciate all our Public Health Heroes' outstanding gifts that make it possible for us to support the critical research and evidence-based initiatives that help us move toward our vision of all British Columbians living in healthy and safe communities.

"Thank you so much to all the donors, supporters, and partners of the BCCDC Foundation for Public Health! Your support is enabling the BCCDC to implement critical COVID-19 research activities that will help keep all British Columbians safer during this global pandemic."

PUBLIC HEALTH HERO SPOTLIGHT

It's been an honour this year to receive messages from various people who want to support our campaigns in unique ways. We've highlighted just a few of them below, but are grateful for each and every one of the creative ways our supporters have found to get the public excited about donating to the BCCDC Foundation to improve public health outcomes in BC.

On April 25th, the Tarry family of Surrey, BC, organized the [BC Stay-at-Home Campout](#) to raise awareness about staying at home for the safety of ourselves and our community. Families could

participate by donating a minimum \$5 "camping fee," that would be donated to our Emergency Response Fund.

From make-shift forts in living rooms, to camping tents set up on patios, balconies, and backyards, countless families across BC and beyond participated and shared pictures of their "campout" in the event's Facebook group. The event ended up being a smashing success and provided \$4,755.00 to the BCCDC Foundation, and the Tarry's began planning for more campouts.

On October 10th, World Mental Health Day, [Sheila Henry](#), a nurse working on the overdose crisis in communities in the Lower Mainland, ran from downtown Langley, through Surrey, New West, and Burnaby to finish a 50K ultra-marathon in the Downtown Eastside of Vancouver, to raise awareness and to support the fight against the stigma of mental health, substance use, and the overdose crisis. Word of Sheila's 50K run took off helping her crush her initial goal of \$1,000.00, and ended up raising a total of \$5,250.00 for the Foundation's Reducing Harms priority.

"The BCCDC Foundation for Public Health speaks my language! That is why I chose this non-profit organization to be the benefactor of my fundraiser. I support the Reducing Harms Priority because all people matter and investing in health equity makes sense."

-Sheila Henry, recent ultramarathon completer, mom, nurse, advocate

Executive Chef of a full-service boutique catering company in Vancouver, Ann Kirsebom, has created award-winning sauces that have been shipped around the world. Inspired by Dr Bonnie Henry, Chef Ann created the [Dr Henry Whisky Sauce](#), “in honour of Dr Bonnie Henry leading us calmly through COVID-19.”

We were thrilled when Chef Ann informed us of her campaign and that she was committed to donating proceeds of the Dr Henry Whisky Sauce to the BCCDC Foundation, until every British Columbian is vaccinated! The BCCDC Foundation has received over \$5,500 to our Emergency Response Fund from Chef Ann’s Dr Henry Whisky Sauce so far, and counting.

OUR BATTLE CRY: ACTIVATE HEALTH

We know that individual actions can have a population-level impact, and we believe that reframing how we think about health can make a difference to the health of everyone. That's why we put the healthy human at the core of everything we do. Through our **Activate Health** campaign, we share our “battle cry for British Columbians:” let's all consider what actions we take as individuals that can make a positive impact to the health of communities, and society as a whole.

What we didn't realize when we launched **Activate Health** in 2019, was how impactful this messaging would become. [The COVID-19 pandemic showed us this very clearly](#), as we all took actions to stop the transmission of the virus, from handwashing to mask-wearing, and many others—this is **Activate Health** in action as we each made choices to protect others. Another element that COVID-19 really brought to the forefront of our attention is mis- and disinformation, as we witnessed the spread COVID-19 information all over the internet, social media, in social groups, families, and elsewhere. As a result, [“Addressing the Infodemic: Everyone Must Play a Role in Stopping Mis- and Disinformation”](#) was another timely **Activate Health** article we wrote, outlining key actions to help address the burgeoning “infodemic.”

We didn't only focus on the pandemic, however. Our work to address, and raise awareness of, the overdose crisis remained vital as we saw overdose deaths steadily increase through the year, and [“When Two Public Health Emergencies Collide,”](#) we are all responsible for doing what we can to help. As we continued to live with two public health emergencies, COVID-19 and the overdose crisis, we highlighted actions like staying up-to-date with public health orders, eliminating stigma in the way we talk about people who use substances, being kind to others, supporting our public health leaders, and more.

Through 20-21, we produced so many more [Activate Health articles](#) to promote healthy actions that can have a positive impact on our population—we firmly believe this focus can, and will, improve the health of British Columbians and through our [21x21x21](#)—21 ways to **Activate Health** over 21 days in 2021, we offered a variety of simple actions, and food for thought, to help shift our collective thinking to a population health level. As the year came to a close, we continued to emphasize **Activate Health**, and as we look ahead, our “battle cry for British Columbians,” will be even more important.

OUR FINANCIALS

INDEPENDENT AUDITORS REPORT

To the Directors of,
BCCDC Foundation for Population and Public Health

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of BCCDC Foundation for Population and Public Health (the “Foundation”), which comprise the statement of financial position as at 31 March 2021, and the statement of changes in net assets, operations and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Foundation as at 31 March 2021, and its results of operations and its cash flows for the year then ended in accordance with Canadian accounting standards for non-profit organizations.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditors’ Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Foundation in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian accounting standards for not-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Foundation’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Foundation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Foundation’s financial reporting process.

Auditors’ Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material

misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal control.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Foundation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Foundation to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

OUR FINANCIALS

NOTES TO THE FINANCIAL STATEMENTS

Change in accounting policies

During the year, the Foundation changed its accounting policy for the recognition of revenue from contributions. In previous periods, the Foundation had used the restricted fund method of accounting for contributions where externally restricted contributions for specific purposes were recognized as revenue of the restricted fund. The Foundation now follows the deferral method of accounting for contributions where restricted contributions are recognized as revenue as the related expenditures are incurred with unrecognized amounts presented as deferred contributions on the statement of financial position. Additionally, the Foundation's financial statements prepared using the restricted fund method followed fund accounting and presented a general fund and a restricted fund on the statements of financial position, changes in fund balances, operations and cash flows. Under the deferral method, the Foundation no longer presents separate funds in the financial statements.

The Foundation has accounted for this change in accounting policy retroactively with a restatement of the prior years' financial statements. As a result, net assets decreased and deferred contributions increased by \$1,888,976 at 1 April 2019, deficiency of revenues over expenses for the year end 31 March 2020 was decreased by \$657,179, and net assets decreased and deferred contributions increased at 1 April 2020 by \$1,231,797.

Investments

Investments consist of the following:

	2021		2020	
	COST	MARKET	COST	MARKET
Fixed Income	\$ 990,955	942,729	\$ 1,019,573	978,185
Equity	849,540	968,076	1,349,546	1,049,816
	\$ 1,840,495	1,910,805	\$ 2,369,119	2,028,001

Investment (loss) income includes \$411,658 (2020 - (\$296,174)) of unrealized gains (losses) on the investment assets during the year.

OUR THANKS

Thank you to our Partners and our Donors

We want to extend our gratitude to all of our donors and partners who have helped us this year, with a special acknowledgement to the individuals, businesses, and organizations that have given over \$5,000 to the BCCDC Foundation.
